

ANNOUNCEMENT

American Ring Acquires Finished Goods Inventory of Truarc LLC.

June 12, 2009

American Ring has successfully concluded the acquisition of the Final Goods Inventory Assets of Truarc Co. LLC. The inventory consists of almost every type and style of ring produced by the 60 year old Retaining Ring manufacturing concern. The full breadth of the inventory includes all critical quality documents such as complete lot traceability and full Military Specification testing that is required to meet defense and aerospace requirements.

The Quality Assurance Team of American Ring & Tool is checking samples of each lot received versus product specifications. Any products received into the American Ring & Tool inventory from this purchase is assured to be within specification.

American Ring & Tool carries the largest and most complete inventory of Retaining Rings, Belleville Spring and allied products in the world. The inventory ranges from the ASME B18.27 American Inch, DIN and JIS standard allowing us to serve all markets with same day shipments. Our manufacturing plant in Detroit, Michigan, along with our global manufacturing partners' coupled with our three strategically located U.S. distribution centers allow us to ship around the clock.

Please allow us to serve your Retaining Ring and Belleville Disc Spring needs. We have a staff of 22 sales representatives to insure your requirements are met.
